

DMSO

This panel shows a control group of worms in DMSO. The worms are fluorescently labeled and appear as bright green, elongated, and mostly straight structures against a black background.

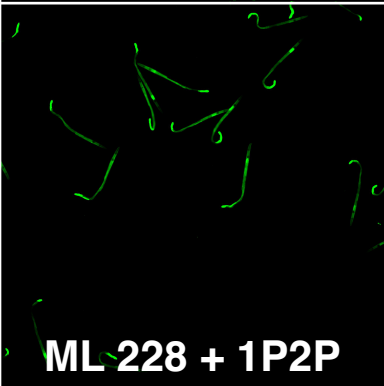

DMSO + 1P2P

This panel shows worms treated with DMSO and 1P2P. The worms are fluorescently labeled and appear as bright green, elongated, and mostly straight structures, similar to the control.

ML 228

This panel shows worms treated with ML 228. The worms are fluorescently labeled and appear as bright green, elongated, and mostly straight structures, similar to the control.

ML 228 + 1P2P

This panel shows worms treated with ML 228 and 1P2P. The worms are fluorescently labeled and appear as bright green, elongated, and mostly straight structures, similar to the control.
